

KURAMDASU CHANDUSRI

+91 7981431193 | chandusri0303@gmail.com | linkedin.com/in/chandu-sri-kuramdasu | github.com/chandu336949

Visakhapatnam, Andhra Pradesh, India 530008 (Open to Relocation)

Summary

Full-Stack Developer skilled in Python, JavaScript, React.js, Node.js, and SQL. Solid core in Data Structures, Algorithms, and OOP, with practical experience building REST APIs and scalable web applications.

Education

Raghu Engineering College

Bachelor of Technology, Computer Science - Grade: 9.27

Oct 2023 – May 2027

Andhrapardesh, India

Technical Skills

- **Languages:** Python, Java, C
- **Back-End:** Node.js, Express.js, RESTful APIs
- **Front-End:** React.js, HTML, CSS, JavaScript
- **Databases:** SQL (MySQL, SQLite)
- **Core CS:** DSA, OOPS, Operating Systems (OS), Computer Networks (CN)
- **Tools & DevOps:** Git, GitHub, Command Line

Projects

AI-Powered Mock Interview Platform (Link: [Live Demo](#), [GitHub](#))

Feb. 2026

Built a full-stack web application that simulates real-world technical interviews using generative AI.

Skills Applied: React.js, Node.js, Express, MongoDB, JWT Authentication, Gemini AI

- Developed a multi-step wizard UI using Gemini AI for resume parsing and question generation.
- Implemented voice communication streams using AssemblyAI and Murf AI for transcription and speech synthesis.
- Integrated a custom Monaco Code Editor interface to enable interactive live-coding segments.

Learning Path Generator via MCP (Link: [GitHub](#))

Jan. 2026

Developed a modular web dashboard that generates personalized learning paths using the Model Context Protocol.

Skills Applied: Python, Streamlit, Model Context Protocol (MCP), Third-Party APIs

- Built a Streamlit interface to automatically generate custom educational syllabi based on timelines.
- Leveraged the Model Context Protocol (MCP) with Google AI Studio to broker cross-platform resources.
- Integrated Pipedream webhooks to dynamically aggregate related YouTube lectures and documentation.

Pneumonia Detection Deep Learning CNN (Link: [GitHub](#))

Nov. 2025

Automated pneumonia detection from chest X-ray images using a Convolutional Neural Network (CNN) pipeline.

Skills Applied: Python, TensorFlow, Keras, NumPy, Pandas, Matplotlib

- Constructed a 2-layer CNN architecture with sequential feature scaling for radiographic image classification.
- Attained an 87% test accuracy threshold by implementing structured image pre-processing routines.
- Optimized model execution to process standalone inference evaluations in milliseconds.

Experience

Frontend Developer Intern — Infosys Springboard (*HTML, CSS, JavaScript, React.js*)

June 2026 – Present

- Designed and developed responsive web applications with a focus on clean UI and seamless user experience.
- Implemented dynamic frontend functionalities using JavaScript and React.js, improving application interactivity.
- Optimized web pages for performance, accessibility, and mobile responsiveness following industry best practices.

Open Source Contributor — Open Source Connect Global (*Git, GitHub, Python, JS*)

Feb. 2026

- Collaborated with a global network to optimize architectural features and maintain codebase reliability.
- Identified, isolated, and resolved community-reported bugs and performance bottlenecks via Git version control.
- Submitted structured pull requests and engaged in technical code reviews to ensure robust software deployment.

Workshops & Certifications

- **MCP Mega Workshop** — NxtWave
- **Workshop on UI/UX Psychology** — GUVI
- **Introduction to Generative AI** — AWS Educate
- **Others:** Infosys Springboard — Python Full Stack

Achievements

- **State-Level Buildathon Qualifier** — Qualified for the state-level hackathon layout, with an innovative project selected from hundreds of statewide entries across the OpenAI Academy × NxtWave Buildathon.
- Got CSE top academic scorer and was awarded an official certificate of merit at Raghu Engineering College.
